

The HNWT's Guide to a Seamless Heritage Project

Navigating Listed Buildings & Conservation Areas with Confidence

CEO Design Service | Bespoke Design & Management
Kensington • Chelsea • Westminster • Mayfair • Belgravia

Your Roadmap to Heritage Excellence

Transforming a listed building or property within a conservation area requires more than vision—it demands expertise, precision, and a deep understanding of heritage planning. With over twenty years of proven experience, we guide discerning clients through every stage of their bespoke project with confidence and clarity.

01

Understanding Your Heritage Context

Every listed building and conservation area presents unique opportunities and constraints. We begin by thoroughly assessing your property's heritage status, Article 4 directions, and planning requirements to create a strategic foundation for success.

02

Securing Planning Permissions

Navigating Listed Building Consent and conservation area permissions requires technical authority and established relationships with planning officers. Our proven track record across RBKC, Westminster, and prime London boroughs ensures efficient approvals.

03

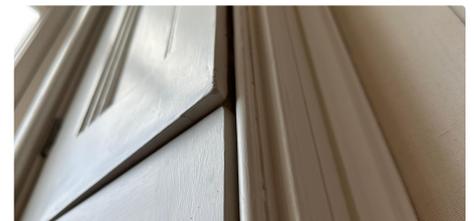

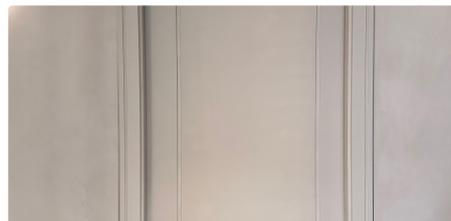

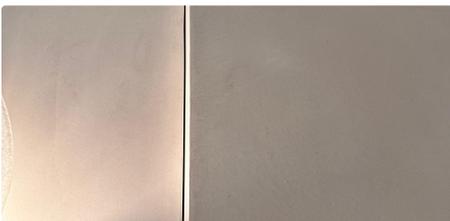

Bespoke Design Integration

Respecting architectural integrity whilst integrating contemporary requirements is our speciality. From period property extensions to heritage security systems, we deliver solutions that satisfy both planning authorities and your exacting standards.

04

Seamless Project Delivery

Comprehensive project management ensures your vision is realised without compromise. We coordinate conservation officers, heritage consultants, and specialist contractors, delivering exceptional results with our typically 8-week planning turnaround.

Schedule Your Confidential Heritage Consultation

Your heritage project deserves a bespoke approach. Let's discuss your vision, the unique constraints of your property, and how our proven process can deliver an exceptional result. Contact our studio to arrange a private consultation.
